

Keeping your child safe online

Always call 999 if you or your
child is in immediate danger.

1. Start talking to your child about content they look at online and what apps they go on.
2. Get clued up on how different apps share personal information. Advise them to keep personal details off social media and keep profiles on private.
3. Get to know their friends in and out of school – they might be talking to different people online. It's good to ask what they talk about in their online chat groups
4. Check the age restriction before your child downloads an app. An app or game that could be suitable for one young person may not be suitable for another.
5. Use parental controls on your child's iPhone and iPad to restrict explicit content, purchases and downloads, and changes to privacy settings. By allowing two factor authentication on your child's iCloud account, it can prevent thieves taking their phone and using their data. Learn more about iPhone privacy settings here.
